

ERP Preparation Checklist

Your checklist for ERP readiness offering a guide for food manufacturers to effectively implement an ERP system.

Define Objectives

- Identify key operational challenges ERP will address.
- Set measurable goals for ERP implementation.

Assess Current Systems

- Evaluate existing IT infrastructure and its limitations.
- Determine readiness for SAP S/4HANA migration.

Optimize Supply Chain

- Map your supply chain processes.
- Implement strategies for real-time visibility and risk mitigation.

Integrate Technology

- Identify areas where AI, IoT, and machine learning can add value.
- Ensure interoperability of current systems with new technologies.

Compliance and Sustainability

- Review regulatory requirements for food manufacturing.
- Develop sustainability practices, including waste reduction and traceability.

Prepare Teams

- Train employees on new systems and processes.
- Create a support structure for post-implementation success.
