

Partnership delaware & ENLYZE

We are glad to introduce ENLYZE, our new strategic partner for machine integration and data analysis.

Who is ENLYZE?

ENLYZE is a tech company specializing in capturing, processing and analyzing production data within the packaging industry. Their platform enables users to evaluate KPIs, machine settings and golden runs while facilitating the sharing of these insights across the company.

What is our joint vision?

The joint vision is to offer customers a standardized solution for machine data collection, modeling, and analysis that integrates with delaware's SAP environment.

What is our joint solution?

Our joint solution includes the Enlyze platform, which extracts machine data from control systems for the MES system, and the Enlyze app, providing ready-made use cases for quality and process optimization.

Key benefits of combining delaware solutions with ENLYZE:

Reliable data

ENLYZE offers robust data recording as a managed service, eliminating the need for internal IT resources while ensuring a high uptime guarantee.

Golden runs

Ensure optimal performance in every task. ENLYZE assists in identifying and standardizing the most efficient plant operations, maximizing OEE.

Faster reactions

Real-time system monitoring and customizable alarms enable quick response to rejects, downtime, or underperformance.
