

ELEVATE the Mill Industry to SAP DM with delaware

Become a digital manufacturing leader with a proven MES solution refined by industry experts

delaware has been a powerful expert in the mill industry for more than 20 years. We have a proven track record in manufacturing execution. We empower you to become a Digital Mill Factory by using SAP Digital Manufacturing efficiently and future-proof from top floor to shop floor and back.

What is d.DM4Mill?

d.DM4Mill is a MES industry solution which covers your manufacturing requirements including mill industry specific requirements and processes.

It seamlessly integrates production managers with machine operators and stakeholders for intra logistics. Quality control along with End2End Traceability goes hand in hand with the solution. You are guided through the production in an interactive way, handling industry-specific process requirements. Machine integration frees your experts from repetitive work and increases data accuracy. Manufacturing insights enable transparency on processes at work center level, along the production process and even across production locations.

Combined Orders and Flexible Units of Measure

- Combined orders as key to reduce set up time and cost and running efficient lot sizes for production
- Enables operators to activate and report on production orders, e.g., make ready and production time, yield, scrap with reason codes for downtime for OEE reporting
- Report in parallel unit of measures, for example KG and M for goods receipt postings

Detailed Traceability Requirements

- Continuous material flow from staging to consumption down to the handling unit level (goods issue & goods receipt)
- Defect registration on different Semi Finish Good levels, elimination along the production steps and plants
- Manual and automated capturing, classification and inheritance of defects
- Visualize machine signals, counter and states at right-time and act in proactive way on predictions

Easy Administration due to Cloud Architecture Combined with Edge Capabilities

- Solution runs native in the cloud
- Combined with edge to support mission critical processes (e.g., machine integration, goods receipt and label printing) to guarantee business continuity
- Buffering of order information on the edge independent to internet connectivity with Bi-Directional integration

we commit. we deliver.

Your Elevate Path to d.DM4Mill

Our Offer to Start with d.DM4Mill

Elevate Assessment for save passage to implement SAP DM

- Agreed price
- Assessment
- Assessment documentation with recommendation for action

Please ask for your individual Elevate Assessment offer!

Elevate Assessment up to Operational Use

- We will secure your legacy expertise by assessing your current execution model
- We support you with our Digital Manufacturing Transformation Roadmap to move your professional core in the current mill solution to the new world of SAP DM
- Your individual digital transformation path starts with our Elevate Assessment, based on our 4-step method:
 - In **Show & Tell** we will demonstrate standard and industry specific functions. On request you will gain access to a demo environment to gain insights on DM capabilities.
 - In **Assess and Fit-to-Standard** we will analyze your processes by interviewing key persons. You will see the MES of the future. Both of us will identify transformation opportunities and quick wins.
 - In **Scoping** we will define concrete and tangible part projects together. You will prioritize topics based on business value.
 - In **Roadmap** we will define further steps based on our analysis of your processes to achieve the target scenario.
- The evaluation is the basis to compare your current state with our solution d.DM4Mill and to outline the target scenario with deltas
- You will receive your individual assessment documentation with elevate path description and cost plan

Your Elevate Path to d.DM4Mill

Why Customers use d.DM4Mill

- Industry-specific individualization
- Further development according to new industry standards and technologies
- Differentiation from competitors

“ Thanks to the successful cooperation in the project team with focus on the common goal, we are now looking at a reliable result

Cornel Müller, Service Delivery and Project Manager, Model Group

”

Tangible Benefits with Desired Outcomes

- Individual Elevate Path for Digital Manufacturing Transformation with cost plan
- Efficient implementation of d.DM4Mill based on many years of experience and a proven best practice framework
- Future-oriented Digital Manufacturing Solution to differentiate from competitors

Why delaware?

We are a global company that delivers advanced ICT solutions and services, guiding our customers through their business and digital transformations. We provide them with the tools to achieve their mission-critical priorities.

Above all, we want to do the right thing. We deliver enterprise and industry expertise that enables our customers' businesses to reach their full potential, while creating a positive impact in a challenging world.
